Re: KWWL, Waterloo, Iowa  
File No. BMPCDT-20090409AEB  
Facility ID No. 593

Dear Licensee:

This is with respect to the above-referenced application for minor modification of KWWL, channel 7, Waterloo, Iowa, licensed to KWWL Television, Inc. ("KWWL Television"). KWWL Television requests a waiver of Section 73.622(f) of the Commission's rules to operate with facilities that exceed the maximum power and antenna height, and amended its application on April 9, 2010 to provide additional information at the staff's request.

In support of its waiver request, KWWL Television states that once the station terminated its pre-transition operations and began operating solely on digital channel 7, many of the station's viewers were no longer able to view the station's over-the-air signal. In an attempt to resolve the VHF reception issues, KWWL Television obtained an experimental license to operate the station with higher power than that authorized by the station's construction permit and permitted by Section 73.622(f). Testing conducted by the station indicates that the power increase significantly resolves KWWL viewers' reception issues. In addition, operation of the station at the higher power would not cause any interference to any full power or Class A television stations.

In view of the foregoing, we conclude that grant of the requested waiver would serve the public interest. Accordingly, the above-referenced application for minor modification of KWWL IS HEREBY GRANTED.

Sincerely,

Barbara A. Kreisman  
Chief, Video Division  
Media Bureau
