Re: KTVB, Boise, Idaho  
File No. BPCDT-20090623ABE  
Facility ID No. 34858

Dear Licensee:

This is with respect to the above-referenced application for minor modification of KTVB, channel 7, Boise, Idaho, licensed to King Broadcasting Company ("KBC"). KBC requests a waiver of Section 73.622(f) of the Commission's rules to operate with facilities that exceed the maximum power and antenna height.

In support of its waiver request, KBC states that once the station terminated its pre-transition operations and began operating solely on digital channel 7, many of the station's viewers were no longer able to view the station's over-the-air signal. In an attempt to resolve the VHF reception issues, KBC obtained an experimental license to operate the station with higher power than that authorized by the station's construction permit and permitted by Section 73.622(f). Testing conducted by the station indicates that the power increase significantly resolves KTVB viewers' reception issues. In addition, operation of the station at the higher power would not cause any interference to any full power or Class A television stations.

In view of the foregoing, we conclude that grant of the requested waiver would serve the public interest. Accordingly, the above-referenced application for minor modification of KTVB IS HEREBY GRANTED.

Sincerely,

A handwritten signature in black ink, appearing to read "Barbara A. Kreisman".
