Re: KMAJ-FM, Topeka, Kansas
Facility Identification Number: 42012
Kansas City Trust, LLC
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed September 25, 2007, for further extension of the special temporary authority (STA) originally granted on January 31, 2001, to operate Station KMAJ-FM with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, Cumulus states that intervening circumstances have prevented it from completing construction of modified facilities authorized by Construction Permit BMPH-20060404AGS.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ Station KMAJ-FM is licensed to Topeka, Kansas, for operation on Channel 299C (107.7 MHz) with effective radiated power ("ERP") of 100 kilowatts (H&V), and antenna height above average terrain ("HAAT") of 370 meters. Construction Permit BMPH-20060404AGS authorizes a change in the community of license to Shawnee, relocation of the transmitter, a downgrade to Class C1 and operation with ERP of 92 kilowatts and HAAT of 311 meters.

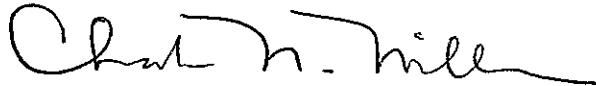

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KMAJ-FM may continue to operate with the following facilities:

Geographic coordinates:	38° 57' 15" NL, 95° 54' 43" WL (NAD 1927)
Channel	299 (107.7 MHz)
Effective radiated power:	15 kilowatts (H&V)
Antenna height:	
above ground:	183 meters
above mean sea level:	551 meters
above average terrain:	229 meters
ASRN ²	1033285

The licensee must notify the Commission when licensed operation is restored. The licensee must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 27, 2008**.

Sincerely,

Charles N. Miller, Engineer
