Special Temporary Authority (STA)  
BESTA-20190301AAX

Dear Mr. Davis:

This is in reference to the request filed on March 1, 2019. CCL requests a further extension of the STA granted on June 29, 2006, to operate with parameters at variance pending the filing of the the required FCC Form 302 application.<sup>1</sup> In support of the request, we noted that CCL did not yet file the application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED and CCL may continue to operate with DA parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

---

<sup>1</sup> WSYR(AM) is licensed for DA operation on 570 kHz with 5 kW (day and night).

This authority expires on **September 17, 2019.**

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke.
