Re: KYLV(FM), Oklahoma City, Oklahoma
Facility Identification Number: 50169
Educational Media Foundation
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed October 11, 2007, on behalf of Educational Media Foundation ("EMF"). EMF requests extension of the special temporary authority ("STA") granted on June 21, 2007, and modified on July 11, 2007, to operate Station KYLV with temporary facilities.¹ In support of the request, EMF states that it has installed its new directional antenna, but that a few tasks remain necessary to complete construction.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is

¹ KYLV is licensed for operation on Channel 205C3 (88.9 MHz) with effective radiated power ("ERP") of 4.4 kilowatts (H&V) and antenna height above average terrain of 206 meters. Construction Permit BPED-20040210AAQ authorizes an upgrade to Class C3, the installation of a directional antenna at the currently licensed site and elevation and an increase in the maximum ERP to 39 kilowatts. Application BLED-20070604AAC, for license to cover the permit, is on file with the Commission.

warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KYLV may continue to operate from its licensed site with the following facilities:

Channel	205 (88.9 MHz)
Effective radiated power:	4.4 kilowatts
Transmitter output power:	1.85 kilowatts
Antenna height:	
above ground:	195 meters
above mean sea level:	555 meters
Above average terrain:	206 meters

EMF must notify the Commission when licensed operation is restored. EMF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 25, 2008**.

Sincerely,

Charles N. Miller, Engineer
