Ms. Lee,

Please move forward to reduce the applicant's ERP by 100 watts to 7.9 kW to conform to the C2 class. Thank you.

Doug Vernier

>The minor mod proposes to increase the HAAT by 2 meters which would trigger a questionable station class. You may either reduce the ERP from 8 kW to 7.9 >kW, or reduce the HAAT from 371 m to 370 m so that the station is in its proper class.

>Please let me know by email and I can fix this accordingly.

>Regards,
