Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed October 26, 2007, on behalf of Pataphysical Broadcasting Foundation, Inc. ("PBF"). PBF requests extension of the special temporary authority ("STA") granted on July 27, 2007, to operate Station KBDH with reduced power.<sup>1</sup> In support of the request, PBF states that the cooling system in its transmitter failed, and that it has obtained a replacement transmitter. However, due to the site's remote location, scheduling difficulties and other delays, the new transmitter is yet to be installed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KBDH may

continue to operate with reduced power. PBF must notify the Commission when licensed operation is restored. PBF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 30, 2008**.
