Re: WLTH Radio, Inc. (WRI)
WLTH(AM), Gary, IN
Facility Identification Number: 38402
Special Temporary Authority (STA)
BESTA-20190828AAP

Dear Mr. Marshall:

This is in reference to the request filed on August 28, 2019. WRI requests a further extension of the STA granted on October 23, 2017, to continue operating ND at night using the daytime site tower as authorized by BP-20190618AAH to allow time to file the required FCC Form 302 application.¹ In support of the request, WRI requests additional time to file the application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and WRI may continue to operate ND at night with a maximum of 0.009 kW using the licensed daytime site tower as authorized by BP-20190618AAH (with no change to the licensed daytime operation). WRI must reduce power or cease operation if interference complaints are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310.

¹ WLTH(AM) is licensed for operation on 1370 kHz with 1 kW ND and 0.5 kW DA from different transmitter sites, and BP-20190618AAH authorizes a new nighttime power of 0.009 kW using the daytime site tower.

This authority expires on **March 3, 2020**.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal tail.
