Regarding WRRL AM, RAINELLE, WV

FCC Facility 54411 License: (attached)

STA: BESTA - 20190605AAN

November 4, 2019

Attention: Son Nguyen, Supervisory Engineer

Via e-mail: Son.Nguyen@fcc.gov

Dear Mr. Nguyen:

The purpose of this letter is to certify that WRRL no longer plans to file a form 301 application for a new site for WRRL AM. The licensee has obtained a new lease agreement to utilize the old licensed site tower again. WRRL resumed licensed operations at approximately 8 AM on Monday November 4, 2019 with the old tower per the last attached 1977 license (with negligible changes to all operating parameters).

Please do not hesitate to contact me directly should you have any questions.

Sincerely,

THOMAS SYNER
President
Shilo Communications, Inc.

Thomas Syner, President Shilo Communications, Inc. 3038 Lansing Edmond Road Edmond, WV 25837

Re:

Shilo Communications, Inc. (SCI)

WRRL(AM), Rainelle, WV

Facility Identification Number: 54411 Special Temporary Authority (STA)

BESTA-20190605AAN

Dear Mr. Syner:

This is in reference to the request filed on June 5, 2019. SCI requests an extension of the STA granted on December 17, 2018, to continue operating from an alternate site to allow time to file the required FCC Form 301 minor change application. In support of the request, we noted that SCI plans to file the application to propose a new permanent facility very soon.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA is hereby GRANTED, and SCI may continue to operate with the following facilities:

Geographic coordinates

Frequency

Hours of operation Operating power

Antenna type

37° 58′ 09″ N, 80° 46′ 44″ W (NAD 1927)

1130 kHz

Daytime only

Not to exceed 0.1 kW (daytime)

ISO-400HP antenna

¹ WRRL(AM) is licensed for ND daytime only operation on 1130 kHz with 1 kW.

SCI must reduce power or cease operations if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR §1.1310.

This authority expires on January 3, 2020.

Sincerely,

Joseph Szczesny, Engineer

Audio Division Media Bureau
