Subject: WBAR-FM License application amendment, 6/11/2008 -- PROGRAM TEST AUTHORITY DENIED

I have reviewed the amendment to license application BLH-20071106ACS which was filed today, 6/11/2008, to cover construction authorized by permit BMPH-20071106ACS.

Program test authority IS DENIED for operations at the full authorized power of 1.25 kW, for the following reasons:

- 1) The measured vertical and horizontal polarizations exceed the authorized construction permit composite pattern at 110, 120, and 130 degrees True;
- 2) The amended license application does not contain manufacturer's instructions regarding the installation and orientation of the antenna on the tower; and
- 3) The amended license application does not contain a detailed description of the testing procedure used by the manufacturer.

Approval for program test authority at full power will not be given until these items are satisfactorily corrected. Until then, WBAR-FM may continue to operate at half power of 0.626 kW in accordance with Section 73.1620(a)(2) of the Commission's rules.

This e-mail is being sent in lieu of a letter that would have been sent for the same purpose.
