In re: Decelles/Smith Media, Inc.  
WEGP(AM), Presque Isle, ME  
Facility Identification No: 9423  
License application BL-20080514AHC  
Program Test Authority

Dear Mr. Decelles:

This is in reference to the above-captioned license application and request for program test authority (PTA) filed by Decelles/Smith Media, Inc. (DSM) to cover the construction permit BMP-20061227ABQ to increase day and night power, and change the nighttime pattern using the existing towers.

A preliminary review of the application reveals that DSM did not submit all required directional antenna full proof exhibits (for example, missing all directional measurement graphs and tabulation pages, nighttime measured pattern polar plot, monitor point photos and descriptions, etc...). In addition, the submitted December 2007 and January 2008 non-directional measurements and tabulation pages are unacceptable since each radial does not contain at least 15 points with a minimum of 7 close-in points within 3 kilometers, as required by Section 73.186 of the Commission's rules.

Accordingly, the request for PTA is DENIED. Further action on the application will be withheld for thirty (30) days to allow DMS to file a curative amendment. Failure to file a curative amendment or a response will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

Son Nguyen
