Re: WQNR(FM), Tallassee, Alabama  
Facility Identification Number: 68310  
Tiger Communications, Inc.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed November 20, 2007, on behalf of Tiger Communications, Inc. ("TCI"). TCI requests extension of the special temporary authority ("STA") granted on May 21, 2007, to operate Station WQNR from a site other than the licensed site.<sup>1</sup> In support of the request, TCI states that it continues its search for a new, permanent location for the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Construction Permit BPH-20071218ABE was granted on March 18, 2008. Thus, the licensee has made substantial progress toward restoring licensed operation, and extension of STA is warranted to allow time for construction of the newly authorized facilities.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WQNR may continue to operate with the following facilities:

Geographic coordinates: 32° 26' 32" N, 85° 14' 29" W (NAD 1927)  
Channel 260 (99.9 MHz)  
Effective radiated power: 4.6 kilowatts (H&V)

---

<sup>1</sup> WQNR is licensed for operation on Channel 260A (99.9 MHz) with effective radiated power ("ERP") of 2.95 kW (H&V) and antenna height above average terrain ("HAAT") of 142 meters. Construction Permit BPH-20071218ABE authorizes relocation of the transmitter and operation with ERP of 2.85 kW (H&V) and HAAT of 146 meters.

Antenna supporting structure:	Temporary pole
Overall height:	30 meters (100 feet)
Antenna height:	
above ground:	28 meters
above mean sea level:	144 meters
Above average terrain:	58 meters

TCI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 25, 2008**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division
