RE: Renewal of Experimental Request 20190708ABJ for KQHR, FCC Facility ID # 175508, The Dalles, OR.

This report is provided to support the request to continue the captioned KQHR Experimental Authorization, which authorizes operation at -10 dBc on the lower IBOC digital sideband and -12 dBc on the upper.

The author has had personal experience with the station for more than two years, having served as consultant throughout that time, and acting Chief Operator from time to time as required.

I have personally observed that the digital signal as authorized is significantly more reliable than the analog signal along Interstate 84 and US Route 14 from east of Cascade Locks to east of The Dalles; in the communities of Bingen and White Salmon in Washington; and in Hood River and The Dalles in Oregon. (The Dalles is the Principal Community for KQHR.) These observations were taken in many different vehicles over a time span of more than two years.

KQHR has now amassed well over 24,000 hours of operation in asymmetrical hybrid mode. Not a single complaint of interference has been lodged with the licensee. All Classical Public Media continues to monitor the operation to ensure that it remains within the authorized parameters.

Thank you,

David J. Doherty  
Technical Consultant
