Re: WIXC (AM), Titusville, Florida
Facility Identification Number: 54505
Genesis Communications I, Inc.
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 10, 2008, on behalf of Genesis Communications I, Inc. ("GCI"). GCI requests extension of the special temporary authority ("STA") granted on October 15, 2007, to operate Station WIXC with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, GCI states that it recently replaced a phase monitor, sampling toroids and sampling lines, which resulted in the need for measurements to confirm proper operation of the nighttime pattern for submission to the Commission. GCI states that additional work is required on the wiring circuits to Tower #3.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WIXC is licensed for operation on 1060 kHz with 50 kW daytime, 17 kW critical hours and 5 kW nighttime, employing different directional patterns for each daypart (DA-3-U).

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WIXC may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. GCI must notify the Commission when licensed operation is restored.² GCI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **January 16, 2009**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
