Reduce power.

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Special operating conditions or restrictions:

- 1 The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- 2 Ground system consists of 120 equally spaced, buried copper radials about the base of the tower, extending 64.1 m in length.
- 3 Pursuant to Sections 73.1030(c) and 73.1620(b) of the Rules, 47 C.F.R. §§73.1030 and 73.1620(b), the authority granted herein is subject to the following conditions:
 - (1) The maximum fundamental field strength produced by the proposed transmitter shall not exceed 44 millivolts per meter (mV/m) (93 dBu) as measured at the Federal Communications Commission's Waipahu, HI monitoring station at any time.
 - (2) In the event of interference, including spurious, intermodulation, or out of band emissions, to monitoring, direction finding, or related operations at the Federal Communications Commission's Waipahu, HI monitoring station, which is in any way related to this station's facilities or transmissions, the licensee shall take such corrective actions as necessary to eliminate the interference at the applicant's risk and expense. Corrective action shall include the provision, installation, and adjustments of suitable transmitter filter circuits, shielding, or other appropriate devices as may be required to eliminate the interference. If these or other measures do not eliminate the interference, the licensee shall reduce power to comply or cease transmissions.
 - (3) If any additional reduction in power is necessary after the station becomes operational to comply with the 44 mV/m (93 dBu) in-channel limit, or to otherwise eliminate interference to the Commission's Waipahu, HI monitoring station, the licensee shall immediately apply for a Special Temporary Authority (STA) and shall file an application with the Commission for the altered parameters.
