Re: Broadcast Station KQAC(FM), Portland, OR
Facility ID No. 59343, FRN # 0005853098
Request for Extension of Experimental Authority to Operate with
Asymmetrical Hybrid Digital Sideband Power
File No. 20171218AAC, extended by 20181206AAZ and 20191210AF1

Dear Mr. Bonacci:

On behalf of All Classical Public Media, Inc., licensee of noncommercial educational FM radio station KQAC(FM), Portland, Oregon, pursuant to FCC Rule 5.203, this letter is written to request an extension of its experimental authority for one year to operate KQAC(FM) full-time with asymmetrical hybrid digital sideband power. The initial authorization was granted by letter dated January 9, 2018, from Susan N. Crawford in the Audio Division of the Media Bureau ("Initial Experimental Authorization"). The authorization was most recently extended by letter from Rodolfo F. Bonacci in the Audio Division of the Media Bureau ("Extension Letter"). A copy of the Initial Experimental Authorization and the Extension Letter are attached along with the report from KQAC(FM) Engineering Consultant, David J. Doherty, detailing the methodology employed and the results obtained.

Also enclosed is the Anti-Drug Abuse Certification of the licensee. No filing fee is required for this type of request.

Please direct any questions regarding this matter to the undersigned.

Respectfully submitted,

Melodie A. Virtue

RE: Renewal of Experimental Request 20191210AFI for KQAC, FCC Facility ID # 59343, Portland, OR

Pursuant to Section 5.203 of Commission's Rules, this report is provided in support of a request to continue the captioned KQAC Experimental Authorization, which authorizes "hybrid" operation at digital effective radiated power (ERP) of -12 dBc on the lower IBOC digital sideband and -14 dBc on the upper digital sideband.

The author of this report has served in various engineering support roles for about 2½ years, and has direct experience with the actual operations of the station throughout that period.

In 2019, KQAC operated extensively from its auxiliary site due to TV repack operations at the main transmitter site and failure of the multi-station combiner. Therefore, we have extensive experience with digital hybrid operation at both sites.

KQAC has now amassed over 28,000 hours of operation in digital hybrid mode without a single complaint of interference to another station from either transmitter site.

All Classical Public Media, Inc. will continue to monitor KQAC to ensure that its operations remain within authorized parameters.

Request for Experimental Authority

Dear Counsel:

The staff has under consideration the above-referenced December 18, 2017, request for experimental authority (Request) submitted on behalf of All Classical Public Media, Inc. (ACPMI), licensee of noncommercial educational FM Station KQAC(FM), Portland, Oregon,¹ to permit KQAC to conduct testing of hybrid digital FM in-band on-channel (IBOC) operation with asymmetric power levels in the digital sidebands. The experimental authority is requested pursuant to Section 5.203 of the Commission's Rules.²

The Request states that ACPMI is seeking experimental authority to operate KQAC with lower sideband (LSB) digital effective radiated power (ERP) of -12 dBc³ and upper sideband (USB) digital ERP of -14 dBc. ACPMI submitted an engineering study in support of the Request.

Our review of the Request indicates that the proposed KQAC experimental operation complies with the contour nonoverlap and other technical requirements of the Media Bureau's Order, adopted January 27, 2010, in Mass Media Docket No. 99-325,⁴ and the Request meets the

¹ File Number BLED-20110517AEK.

² 47 CFR § 5.203 (Section 5.203).

³ Decibels relative to analog carrier.

⁴ See *Digital Audio Broadcasting Systems And Their Impact on the Terrestrial Radio Broadcast Service*, Order, 25 FCC Rcd 1182 (MB 2010).

requirements for experimental operations set forth in Section 5.203. Accordingly, the Request is **HEREBY GRANTED**. KQAC may operate with digital ERP as follows:

Analog ERP:	5.9 kilowatts (kW), Max-BT, H&V ⁵
LSB Digital ERP: ⁶	0.185 kW
USB Digital ERP:	0.120 kW.

This experimental authority expires on **January 9, 2019**. This authority is specifically conditioned on the lack of objectionable interference. A report detailing the methodology employed and the results obtained must be submitted within 90 days following the conclusion of the experimental operation. Any request for extension of this experimental authority should be filed at least 30 days prior to the expiration date of the authority. Additionally, an extension request must include an interim version of the aforementioned report that details the progress of the experimental operation as of the filing date of the request.

Sincerely,

Susan N. Crawford

⁵ All ERP values rounded in accordance with 47 CFR § 73.212(a).

⁶ Digital ERP values shown are for MP1 service mode. The licensee must adjust the station's asymmetric total digital sideband ERP values in accordance with NRSC guideline "NRSC-G202-A, FM IBOC Total Digital Sideband Power for Various Configurations" (April 2016) if operating using a service mode other than MP1.

File No. 20191210AFI

**Request for Extension of Experimental
Authority**

Dear Counsel:

The staff has under consideration the above-referenced December 10, 2019 request for extension of experimental authority (Request)¹ submitted on behalf of All Classical Public Media, Inc. (ACPMI), licensee of noncommercial educational FM Station KQAC(FM), Portland, Oregon,² to permit KQAC to continue to conduct testing of hybrid digital FM in-band on-channel (IBOC) operation with asymmetric power levels in the digital sidebands. The extension of experimental authority is requested pursuant to Section 5.203 of the Commission's Rules.³

The Request states that ACPMI is seeking experimental authority to continue to operate KQAC with lower sideband (LSB) digital effective radiated power (ERP) of -12 dBc⁴ (0.185 kW) and upper sideband (USB) digital ERP of -14 dBc (0.12 kW).⁵ In support of the extension request, as required, ACPMI reports that KQAC has amassed over 20,000 hours of operation in digital hybrid mode and there have been no complaint of interference from any party.

ACPMI's request for extension of experimental authority for KQAC meets the requirements for experimental operations set forth in Section 5.203. Accordingly, the extension request is **HEREBY**

¹ File Number 20171218AAC (granted 1/9/2018), as extended by File No. 20181206AAZ.

² File Number BLED-20110517AEK.

³ 47 CFR § 5.203 (Section 5.203).

⁴ Decibels relative to analog carrier.

⁵ Analog ERP is 5.9 kilowatts ("kW"), H&V

GRANTED. This experimental authority expires on **January 9, 2021**. This authority is specifically conditioned on the lack of objectionable interference. A report detailing the methodology employed and the results obtained must be submitted within 90 days following the conclusion of the experimental operation. Any request for extension of this experimental authority should be filed at least 30 days prior to the expiration date of the authority. Additionally, an extension request must include an interim report detailing the progress of the experimental operation as of the filing date of the request.

Sincerely,
