Special Temporary Authority (STA)  
BESTA-20201216AAE

Dear Mr. Batth:

This is in reference to the request filed on December 16, 2020. XLM requests a further extension of the STA granted on September 21, 2017, to continue ND operation to allow time to file the required FCC Form 302 application to update all operating parameters.<sup>1</sup> In support of the request, we noted that XLM will require additional time to install the new replacement tower, complete all other remaining repairs/modifications, and file the application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and XLM may continue to operate ND with a maximum of 2 kW (day) and 1.5 kW (night). XLM must reduce power or cease operations if complaints of interference are received, and use whatever means are
