

Dear Victoria,

Wzsk has been up and down since the pandemic. Advertising fell off a cliff and I have been doing everything to keep operations stable. I was purchasing new equipment for the translator before the shutdown. I had a major issue with the main BE-Transmitter. Which is at Lightner Electronics in Claysburg, PA and is almost completed for final repair. There is one more board that needs replaced and financially should be able to be completed in July. My backup transmitter a Wilkinson which has been up and down during the duration. It is a life's end. I have kept WSKE in full operation but have failed to keep consistent on the WZSK due to financial issues.

Our state has now opened the economy and advertising is picking up. I have also diversified our business to allow new income to help. I do not have representation and cannot afford it. Please consider the circumstances: I am at the mercy of your organization to stay afloat. Our sister station WSKE serves the public very well through supporting events for public safety: EX: fund raising for local fire companies, public awareness and serving the public with live DJ's to keep the listeners informed directly without delay.

Thanks Again for your time and consideration.

Thanks! Shane S. Imler
