**STATEMENT OF JAMES D. SADLER  
IN SUPPORT OF AN APPLICATION  
FOR DIRECT MEASUREMENT OF POWER  
STATION WAVA – ARLINGTON, VIRGINIA  
780 kHz - 12 kW-D, 9.8 kW-CH, ND  
FACILITY ID: 54465**

Applicant: Salem Communications Holding Corporation

I am a Technical Consultant, an employee in the firm of Carl T. Jones Corporation with offices located in Springfield, VA. My education and experience are a matter of record with the Federal Communications Commission.

**GENERAL**

Salem Communications Holding Corporation (“SCHC”), licensee of Radio Station WAVA, Arlington, Virginia, is licensed for operation on a frequency of 780 kilohertz at a power of 12,000 Watts during daytime hours and 9,800 Watts during critical hours employing a non-directional folded unipole antenna.

This office has been authorized by SCHC to prepare this engineering statement and Section III of FCC Form 302-AM in support of an Application for Direct Measurement of Power. AT&T has completed the modification and installation of equipment on the shared tower of WAVA. In addition, another tenant on the tower, Montgomery County, has removed all of their equipment from the tower. Impedance measurements performed before and after the modifications were completed showed the modifications resulted in a change of the WAVA base resistance. The WAVA

antenna base impedance was measured, by the undersigned, at the output J-Plug of the WAVA impedance matching circuit. The measurements were made using a Delta Electronics, Model OIB-3, operating impedance bridge. Following the completion of the AT&T and Montgomery County changes, the impedance was found to be  $Z = 66 + j 339$  Ohms. The transmitter power output was set such that the unmodulated current at the output of the impedance matching network is 13.5 amperes for a daytime power output of 12,000 Watts and 12.2 amperes for a critical hours antenna input power of 9,800 Watts.

**SUMMARY**

It is submitted that the WAVA antenna system is in full compliance with the terms of the station's authorization. Further, it is requested that a superseding license be issued to reflect the new operating parameters submitted herein.

The engineering statement, FCC Form 302-AM, Section III, and the attached figure were prepared by me or under my direct supervision, and the information contained therein is believed to be true and correct.
