Mr. Bonacci -

Per our conversation on Friday, I filled out an "old style" CDBS application for SSR Communications' long form Auction 109 winning bid for MM-FM1226A at Caliente, Nevada. I did not actually file it, of course, but I was able to save it as a pdf copy, which is attached hereto with an engineering exhibit. Please let me know if you need anything else.

I have fully paid the auction bid price and application fee (as part of CDBS application BNPH-20181129AAC, from the initial allotment proceeding).

There is a community of license change associated with this proposal. I apologize in advance for any headaches it may cause. For reference, I wanted to file a C3 upgrade with CO Order To Show Cause downgrade along with this application, but I did not want anyone at the Media Bureau to be too upset with me!

If possible, please confirm that you have received this information.

As always, I sincerely appreciate your efforts and consideration of this issue. If you have any questions, then please do not hesitate to call.

Respectfully,

Matthew Wesolowski
