

Federal Communications Commission Washington, D.C. 20554

October 18, 2021

Brian Byrnes, Receiver 205 N. Michigan Ave. Suite 810 Chicago, IL 60610

> Re: Brian Byrnes, Receiver WBGX(AM), Harvey, IL Fac. ID No.:40147 Special Temporary Authority

Dear Applicant

This is in reference to the request filed October 6, 2021, on behalf of Brian Byrnes, Receiver. Mr. Byrnes requests special temporary authority ("STA") to operate station WBGX(AM) with parameters at variance from license values and/or reduced power while maintaining monitor points within license limits. ¹

In support of the request, Mr. Byrnes states that the addition of FM translator station W240EI to one of the WBGX(AM) towers has changed the tower impedance. Impedance measurements have been done and a Method of Moments proof will be completed within the next 30 days, along with an FCC Form 302 application reflecting the changes. However, in the meantime, the station requests an STA to operate with parameters at variance from license values and/or reduced power while maintaining monitor points within license limits.

Accordingly, the request for STA IS HEREBY GRANTED. Station WBGX(AM) may operate with parameters at variance from license values and/or reduced power while maintaining monitor points within license limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. The licensee must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on April 16, 2022.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations

1

¹ WBGX(AM) is licensed for operation on 1570 kHz with a daytime power of 1.1 kilowatts and a nighttime power of 0.5 kilowatt, employing different directional antenna patterns (DA2-U).

would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck Audio Division Media Bureau
